

SIXTH SENSE

The Thinking Terminal

SIXTH SENSE for the C-64:

The most powerful terminal program available! SIXTH SENSE contains all the features of the Common Sense terminal which came with your modem, PLUS:

SIXTH SENSE is the terminal program that gives YOU the power to design your own personal communications. Instead of limiting your options to pre-programmed activities (functions), SIXTH SENSE obeys your desired sequence of elemental actions. These "primitive" functions combined for your personal needs, transform SIXTH SENSE into a terminal program unique to you. And SIXTH SENSE is not limited to inflexible actions caricatured as "robotic behavior." You can define alternative actions in response to external events, including the time of day, information received from the modem, a programmable counter (useful for limiting repetitive procedures), and the beginning of the 700 line virtual screen.

Experience personal communications at its best — your way — with SIXTH SENSE.

Macro Language for fully or partially unattended operations. Sixteen simultaneous test conditions. Conditional branching for multiple-path dialogs. Virtually all commands available from the keyboard can be programmed into the macro keys. New commands available include setting and testing conditions. These conditions can include text matching (prompts), time of day, a programmable counter, and the screen line location.

SIXTH SENSE brings you the features needed for effective, comfortable telecommunicating AND the power of your computer to perform tasks quickly and efficiently.

Suggested retail: **\$69.95**

SIXTH SENSE for the C-128:

All the features of the C-64 version in 80 columns, and even more!

The expanded capabilities of the C-128 enable a similar growth in the best terminal program on the C-64. SIXTH SENSE now provides you with optional menus for performing its many functions. The virtual screen now measures 700 80-column lines. SIXTH SENSE now has direct editing of the virtual screen to enhance its ease of use. It brings increased flexibility in your ability to design more comprehensive macro structures for your personal communications environment.

Enter commands either from pull-down menus or command keys. Up to twenty-three simultaneous conditional tests. 16 programmable counters. Virtual screen editing.

Suggested retail: **\$79.95**
