

Documentation Update: PacificPage P•E and PacificPage P•E for Macintosh

Installing, testing, and using PacificPage P•E in the IIIP

For information on installing, testing, and using the PacificPage P•E cartridge with a LaserJet IIIP, follow the LaserJet IIP printer instructions listed in your *PacificPage P•E Users' Guide*.

Selecting Resolution Enhancement (LaserJet IIIP)

PacificPage P•E supports the Resolution Enhancement option of the LaserJet IIIP. Before you install the cartridge on your LaserJet IIIP, you must set the Resolution Enhancement option from the printer control panel. Follow these steps to set the Resolution Enhancement option:

1. With the cartridge is installed, software switch to PCL mode from the printer's front panel.
2. Press **On Line** to switch the printer to the off-line status (indicator light off).
3. Press **Menu** repeatedly until DEVICE CONFIG is displayed.
4. Press **Enter**. AUTOCONT (Auto continue) is displayed.
5. Press **Menu** repeatedly until RET=X is displayed. (X=OFF, DARK, MEDIUM, or LIGHT.)
6. Press the + (plus) or - (minus) key to change the setting. Press **Enter** to select dark, medium, or light resolution. For most printers a medium setting is suggested. An * (asterisk) will appear next to the selected value.
7. Press **On Line** to return the printer to on-line status.

LaserJet IIIP exclusions

PacificPage XL does not support PacificPrint or Pacific Connect when used with a LaserJet IIIP printer.
